

EVENT: ESA DAY AT DEEP TECH ATELIER 2024

For already the 3rd time, Deep Tech Atelier will host the European Space Agency (ESA) Days in Latvia. The event will take place on 16-17 May 2024 in Riga alongside several side events, including an ESA Career Day!

Deep Tech Atelier is the largest deep tech industry forum in the Baltics welcoming hundreds if not thousands of people in Riga for already 6th year in a row. The mission of Deep Tech Atelier is to motivate the growth of knowledge-intensive business and international cooperation.

DEEPTech ATELIER

Scientific excellence into
market success

16 -17 MAY, 2024

MISSION
Latvia

This year, Deep Tech Atelier is having an exciting program on 3 stages:

- **Deep tech stage** as the main stage discusses essential topics for innovators, including future trends, raising funds, and what mindset innovators and leaders of deep tech companies need to develop. Don't miss the start-up and reverse (investor) pitches on the deep tech stage as well!
- **BioCosmic stage** hosts European Space Agency (ESA) Day on May 16, which will spotlight the topics of entrepreneurship and commercialization, while on May 17, it focuses on breakthrough biotechnologies.
- **Growth stage** tells the success stories supported by Norway grants and is a place where to exchange ideas of technology transfer.

Take a look also at our many workshops, practical masterclasses, and other side events!

BioCosmic stage will offer the visitors a varied programme with speakers from the European Space Agency and other organisations.

Take a look into the programme [here](#).

Don't forget to use a wonderful opportunity to learn about your career opportunities in the space domain at the side event on 15 May: [ESA Career Day](#).
