

EVENT: SPACETalks 4.0 on 26-27 March in Oxfordshire

SPACETalks is a dynamic in-person event dedicated to fostering direct connections between investors and space-tech entrepreneurs - all while raising awareness about the industry's current issues and trends; this time targeting both upstream and downstream sectors.

Cosmonauts is thrilled to present the 4th iteration of SPACETalks, taking place on 26-27 March 2024 at the European Space Agency Convention Centre, Oxfordshire. This is a dynamic in-person event dedicated to fostering direct connections between investors and space-tech entrepreneurs - all while raising awareness about the industry's current issues and trends.

SPACETalks offers a unique opportunity not only to learn about the latest advances in space technology, but to invest in them. Through engaging panels, immersive exhibitions, and personalised sessions, attendees will have ample opportunities to network and collaborate within the space technology community. By bringing together leaders and innovators in space technology with investors, SPACETalks serves as a pivotal platform for learning, discussion, and investment in space technology. Join us as we drive this incredible industry above and beyond.

WHAT SHOULD I EXPECT?

SPACEtalks has been designed to make space-tech accessible and inspiring. With panels and solo sessions from industry experts, expect engaging discussions on the problems, nuances, and advances of this fascinating sector.

UPSTREAM DAY

PANEL: ELEVATING THE HORIZON: Fostering Regional Growth in the UK Space Industry

Analyse regional opportunities for growth in the UK's space industry upstream sector, fostering innovation, job creation, and economic development.

PANEL: HARMONISING THE FINAL FRONTIER: AI, Cybersecurity, and a Unified Approach to Space Regulation

Examine AI and cybersecurity's impact on space regulation, enhancing measures for asset protection. We'll address challenges in regulation harmonisation, propose strategies for unified governance amid dynamic space activities, and stress international collaboration's significance.

DOWNSTREAM DAY

PANEL: THE RACE FOR SPACE IS A RACE FOR HUMANKIND: Balancing Growth, Sustainability and Debris Mitigation

Address challenges in managing and regulating growth while promoting responsible practices, emphasising international cooperation for sustainability. Explore innovative technologies and approaches to ensure sustainable space exploration.

PANEL: CULTIVATING COSMIC CAPITAL: Investing in the Future of Space Technology, Perspectives from Deep Tech Investors

Discuss the evolving landscape of space technology investments and emerging

opportunities for deep-tech investors. Examine the expected sector expansion amidst macroeconomic variables and explore factors beyond sustainability, global security, food security, and humanitarian assistance driving investments in the space industry.

WHO IS ATTENDING?

SPACEtalks hosts a number of industry-leading and professionals and other insightful speakers from around the world. Some of the attendees include: • Investors • Founders • Government Representatives

WHY ATTEND?

Meet and network with decision-makers representing emerging tech, companies and large corporations.

- Learn about the latest trends in space technology and be a step ahead of the crowd.
- See and experience the latest innovations in the space sector first-hand.
- Listen to experienced speakers who understand their fields and have invaluable insights to share.
- Strengthen existing relationships and make new acquisitions!
