

EVENT: Winter Satellite Workshop 2024

On 17-19 January, Winter Satellite Workshop 2024 will take place in Espoo Dipoli (Finland) together with Finnish Remote Sensing Days and FinCOSPAR Convention. Opportunity to exhibit, no participation fee for individuals and open call for abstracts!

Winter Satellite Workshop 2024

WITH FINNISH REMOTE SENSING DAYS AND
FINCOSPAP CONVENTION 17-19 JANUARY 2024,
ESPOO DIPOLI, FINLAND

Winter Satellite Workshop 2024 with Business EXPO

The Winter Satellite Workshop is successor of the Finnish Satellite Workshop, the biggest New Space meeting in Finland, Scandinavia and the Baltic countries. It brings together space tech specialists, scientists and students to discuss current topics in a rapidly developing space field. The scope is set on New Space, small satellite missions, small satellite platform development, space science and instruments, Earth Observation and sustainable utilization of space. Our Business EXPO brings together regional market leaders of space and EO business to popular three day exposition which will have hundreds of visitors. Be quick and secure your booth ticket in time, as we can accommodate only 40 companies.

The event is known for its friendly community and great social events. We have no registration fee for participants!

Remote Sensing Days

Over 25 years, the Finnish Remote Sensing Club has arranged a workshop, called Finnish Remote Sensing Days. The event has brought together specialists all over Scandinavia and Baltic states to discuss the latest advancements in the fields and developing ideas for next space instruments and funding applications. Since 2020 Remote Sensing Days have been organized together with Satellite Workshop.

FinCOSPAP 2024

The XIX meeting of Finnish space research, FinCOSPAP is arranged together with WSW2024. The committee on Space Research (COSPAP) was established by the International Council of Scientific Unions (ICSU) in 1958. The ICSU resolution creating COSPAR was to "provide the world scientific community with the means whereby it may exploit the possibilities of satellites and space probes of all kinds for scientific purposes, and exchange the resulting data on a cooperative basis." The Finnish

National Committee of COSPAR has participated in the international and national co-operation of scientific space research since 1964.

When and how?

- 20.6.2023 Registration opens
