

NEW: Become an ESA YGT today!

The European Space Agency (ESA) has launched another call for applications this February for Young Graduate Trainees!

The Young Graduate Trainee (YGT) Programme offers young graduates the opportunity to gain valuable on-the-job experience in the development and operation of space missions in an international and multicultural environment. Every year in February, we offer about 100 job opportunities in science and engineering, information technology, natural or social science or business.

Join this live webinar event on February 7 to discover everything you need to know about the programme, ask your questions and get a head start on preparing your application. Your path to space begins at ESA!
