

OPPORTUNITY: Registration for CM25 Industry Event on 03 and 04 April 2025 still open

On 3-4 April 2025, ESA is organising an information event for industry dedicated to the upcoming ESA Council at Ministerial Level in November.

During this two-day event, Programme Directorates will present current plans and considerations with regard to their CM25 programme proposals and will engage in exchanges with industry. The objective of the event is to inform industry and seek feedback to consolidate the proposals, support the decisions to be made at CM25 and improve the implementation after CM25.

The event is open to industrial entities (1 representative per company) and industry associations (1 representative each) from ESA Member States, Associate States and Cooperating States. Delegations are also invited to join (1 representative per Member State).

Registration is on a first-come, first served basis. Please note that places are limited. Registration will close on 20 March, or as soon as all available places are booked.

[Register now.](#)

The CM25 program features a series of presentations and discussions centered on various aspects of space exploration and technology. Key topics include ESA's connectivity and secure communications, navigation programs, human and robotic exploration, and industrial opportunities. The event also covers ESA's Earth observation, science programs, space transportation, and space safety. Prominent ESA directors, including Josef Aschbacher, Géraldine Naja, and Carole Mundell, will lead discussions on these subjects, offering insights into ongoing and future space missions. Networking opportunities are provided on both days, fostering collaboration and discussion among participants.

The event agenda is now available at [CM 25 event page](#).
