

# SUCCESS: Allatherm Earns EN 9100:2018 Certification, Elevating Aerospace Safety and Quality Standards in Latvia

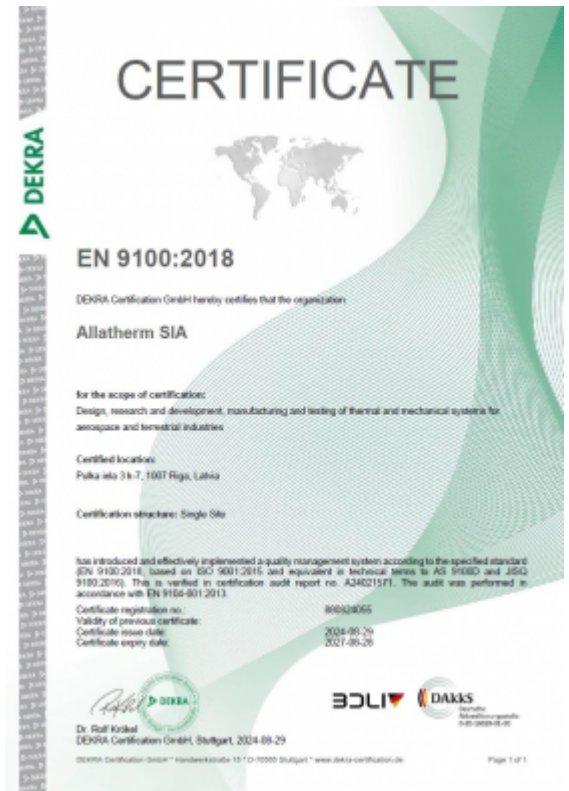

At the end of August, Allatherm SIA obtained the EN 9100:2018 certification, underscoring its dedication to upholding the highest international standards in safety, quality, and performance within the aerospace and terrestrial industries. This milestone marks a significant advancement for Latvia's space industry, further solidifying the country's presence in this rapidly evolving and developing field.

The EN 9100 (AS 9100) is an internationally recognized standard that outlines the specific quality management requirements for organizations operating in aerospace and defense industries, including manufacturers, suppliers, and maintenance providers. The scope of Allatherm's certification includes the "Design, research and development, manufacturing, and testing of thermal and mechanical systems for aerospace and terrestrial industries".

By attaining this certification, Allatherm reinforces its ability to consistently deliver products and services that meet the demanding requirements of aerospace and terrestrial applications. The certification not only highlights enhanced quality assurance but also demonstrates that the company's processes align with global best

practices, reducing risks and optimizing performance. While this achievement is a testament to Allatherm's ongoing commitment to excellence, the company remains focused on continuous improvement.

For Latvia, this certification represents not only a corporate achievement, but also strengthens the nation's role as a reliable collaborator in the global space industry. The certification gives Allatherm a competitive edge, reinforcing its longstanding dedication to delivering the highest levels of quality and reliability. This ensures that current and future partners can have full confidence in the company's adherence to the most rigorous industry standards, fostering trust, minimizing risks, and ensuring outstanding performance across all operations.

## About Allatherm SIA

Allatherm SIA provides thermal science and heat transfer devices manufacturing expertise, measuring equipment calibration service, contract R&D, CNC machining service and consulting service.
